

Lebek KS

Oral Solution

10% Triclabendazole

Definition:

It is a cream-coloured viscous oral suspension which includes Triclabendazole.

Composition:

Each ml contains 100 mg Triclabendazole.

Indications:

Lebek KS is indicated in the treatment and seasonal control of acute and chronic fascioliasis caused by *Fasciola* spp. on cattle and sheep. When used in the appropriate dosage, it is highly effective on immature (after 2-days old) and mature *Fasciola* spp.

Dosage and administration:

Sheep (live weight)	Lebek KS (ml)	Cattle (live weight)	Lebek KS (ml)
10 Kg	1 ml	100 Kg	12 ml
20 Kg	2 ml	150 Kg	18 ml
30 Kg	3 ml	200 Kg	24 ml
40 Kg	4 ml	250 Kg	30 ml
50 Kg	5 ml	300 Kg	36 ml
60 Kg	6 ml	350 Kg	42 ml
		400 Kg	48 ml
		500 Kg	60 ml

For sheep; 2 ml dosage is added after 60 kg for every 5 kg live weight.

For cattle; 6 ml dosage is added after 500 kg for every 50 kg live weight.

Packing:

Plastic bottle of 100 ml in cardboard box with an oral dispenser inside.
